

# RGE KNOX

**Fictional Community Connection: Mapmaker**

**Element: Water**

**Primary concerns: What are the primary goals for your group within Fauxville but also within the specific scenario the community currently finds themselves**

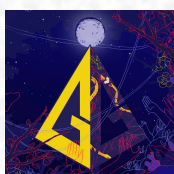

1. There is a lack of mapped routes, the data center project will omit areas of the city that would most benefit from being connected to this project (largely black and low socioeconomic areas)
2. Wants to assist with the creation of the digital community center's front facing map/ recreation of the town
3. Thinks the community should have more say in how the data center uses their likeness and data

**Thoughts on Data Center:** You are overall neutral, the data center and associated AI is ultimately a tool

- **Pro:** The data center and its connected technologies are opportunity areas for black women in tech to lead
- **Con:** Black communities are being harmed by irresponsible data center placement
