

# THE BOTTOM

**Fictional Community Connection: Community Bookstore & Art Studio**

**Element: Fire**

**Primary concerns: What are the primary goals for your group within Fauxville but also within the specific scenario the community currently finds themselves**

1. Providing literature access to the community about varying perspectives on environmental justice to get the best solutions
  - a. With the goal of educating the community about potential harms to the environment and community.
2. Directing community to engage with art gallery to engage with physical art while we still have access
3. Providing access to black literature and art workshops to engage community

**Thoughts on Data Center: Anti Data Center**

Con: AI interprets our ancestral knowledge based on the whims and goals of the programmer. Most programmers in our town do not reflect or understand our culture. The lack of cultural programmers can cause more harm than good.

**For additional context:**

- You were always adamantly against the Data Center storing our data but are willing to go along with this new project for the sake of the community. But you still provide physical access b/c it is how the organization has always shown up for the community.
- You've always had questions on how safe is the data you're sharing and what the actual uses of it are, not just what they say they will use it for.
