Fictional Community Connection: Outdoor Activities Group

Element: Earth

Primary concerns: What are the primary goals for your group within Fauxville but also within the specific scenario the community currently finds themselves

1. To provide community members an opportunity to reconnect with nature
2. The waste and light pollution from the data center is having a negative impact on wildlife
3. To educate on the importance of why protecting wildlife should be everyone's priority

Thoughts on Data Center: You are starkly against the creation of the digital community center, this puts you at odds with the rest of your crew who is largely interested in finding the positives in how AI and the data center can be used.

- **Pros:** None, you are more concerned about nature preservation than tech expansion
- **Cons:** There are concerns about harms to nature

For additional context/talking points

- You have noticed that there have been even more emissions from the smoke stacks recently
- Even before the pilot project, you heard from some community members nearest to the data center that they have been experiencing light pollution that is affecting their ability to sleep
