

FIRE CREW

Your Name: _____

Crew Lead: Julian

Fire centers around: Community building and protest
Your crew is against the use of Artificial Intelligence.

Fire symbolizes creative expression, protest, destruction, and rebirth. This is why it is associated with the hip hop element of **graffiti**. **Graffiti is a form of visual communication used to leave your mark and has served as glimpses into the lives of those who came before us as well as their thoughts and opinions.** Graffiti can be art, protest, or simply a reminder to the world that you were here.

Throughout the day you are going to be exploring a not so distant future where Artificial Intelligence (AI) will be used to streamline everyday life and make information more accessible. You will learn more about how AI will be integrated into the town as the day goes on.

Questions to consider throughout the day:

How does AI have an effect on creative expression?

Is there a non harmful way that AI could be used to promote creative expression?

Is there a better, more environmentally friendly way to store our data?

WATER CREW

Your Name: _____

Crew Lead: Maddei

Water centers around: Waterways, conservation of water, prevention of dead zones
Your crew is neutral to the use of Artificial Intelligence.

Water symbolizes flow, rhythm, and transformation. This is why it is associated with the hip hop element of **DJing**. **DJing is the art of entertaining by mixing prerecorded music to create a unique and exciting listening experience.** It is constantly undergoing transformation as technology evolves and individual DJs cultivate their equipment to their own sound and vibe. DJing takes pre-existing art and transforms it into something new, adding their own flare and adjusting to influence the energy of the space by reading the dance floor.

Throughout the day you are going to be exploring a not so distant future where Artificial Intelligence (AI) will be used to streamline everyday life and make information more accessible. You will learn more about how AI will be integrated into the town as the day goes on.

Questions to consider throughout the day:

What effects does AI have on water conservation?

If any, is there a way to mitigate this problem?

Is there a way for AI to be used to assist in waterway management?

EARTH CREW

Your Name: _____

Crew Lead: Jeff

Earth centers around: Living off the earth, planting, community gardens
Your crew is for the use of Artificial Intelligence.

Earth symbolizes grounded movement, adaptability, and survival. This is why it is associated with the hip hop element of **breaking**. **Breaking, or break dance, is an energetic, acrobatic form of street dance that heavily relies on using the ground as prop or even a partner.** Breaking allows for the exchange of movement, energy, ideas, and creative individual expression.

Throughout the day you are going to be exploring a not so distant future where Artificial Intelligence (AI) will be used to streamline everyday life and make information more accessible. You will learn more about how AI will be integrated into the town as the day goes on.

Questions to consider throughout the day:

How can AI be used to benefit humanity, to make us more adaptable to a changing world?

What concerns should we have when approaching this?

What does it really mean for us to be able to have and archive so much information about the world?

AIR CREW

Your Name: _____

Crew Lead: Kyra

Air centers around: Greenhouse gases, reducing emissions
Your crew is neutral to the use of Artificial Intelligence.

Air symbolizes voice, narrative, and breath. This is why it is associated with the hip hop element of **EmCeeing. EmCeeing, or MCing, although it originated long before rap, can easiest be described as the act of rapping or rhythmic speaking to inspire people with clear, concise, compelling content.** EmCeeing incorporates breath control, word play, and rhyme to deliver messages and creatively convey the thoughts of the EmCee.

Throughout the day you are going to be exploring a not so distant future where Artificial Intelligence (AI) will be used to streamline everyday life and make information more accessible. You will learn more about how AI will be integrated into the town as the day goes on.

Questions to consider throughout the day:

What effects does AI have on greenhouse gas emissions?

If any, is there a way to mitigate these emissions?

Is there a way for AI to be used to assist in GHG emissions management?
