

YES! KNOXVILLE

Fictional Community Connection: Community Center

Element: Fire

Primary concerns: What are the primary goals for your group within Fauxville but also within the specific scenario the community currently finds themselves

1. Showing how the connectivity of the community is poor and ultimately disjointed
2. A digital community space is not the same as having real, in person third space
3. The money and effort that is going into building a digital twin of the community could be spent creating more housing.

Thoughts on Data Center: Anti Data Center

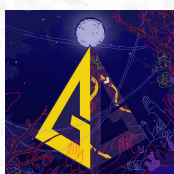

- **Pros:** Sure the data center can hold onto ancestral community knowledge
- **Cons:** Archiving ancestral knowledge can be done without AI. Moving the community to online spaces may further eliminate the building of physical third spaces.

For additional context:

- You have noticed that there have been even more emissions from the smoke stacks recently
- Even before the pilot project, there were fewer and fewer people coming to the community center, opting for more individual activities
